DELIVERY INFO 59

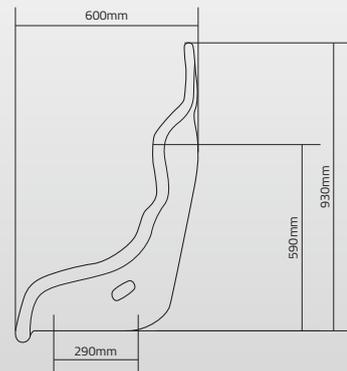

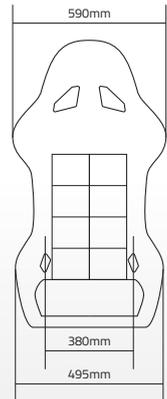

MOTAMEC EVO-ONE FIA APPROVED RACE SEAT

PART: MTEVOONE-BLK

Fibreglass GRP shell
 Black fabric upholstered
 5 slots for harnesses (4/5/6 point)
 2 Adjustable cushions for maximum comfort
 HANS® compatible
 Kidney cushions included
 Split leg cushions
 Threaded mounting holes for side mount (mounts sold separately)
 Weight: approx: 7kg (without side seat mounts)
 Seat side mounts hole centres measurement: 290mm
 FIA Approved: FIA 8855-1999

MOTAMEC EVO-TWO FIA APPROVED RACE SEAT

PART: MTEVOTWO-BLK

Fibreglass GRP shell
 Black fabric upholstered
 5 slots for harnesses (4/5/6 point)
 Kidney cushions included
 Split leg cushions
 HANS® compatible
 Threaded mounting holes for side mounts
 Weight: approx 7.80kg (without side seat mounts)
 Seat side mounts hole centres measurement: 290mm
 FIA Approved: FIA 8855-1999

 
LIGHTWEIGHT MADE IN UK

ALLOY - RACE SEAT SIDE MOUNTING BRACKETS

PART: RX-ASM-2-STICKER

Universal fitting, fits most side mount race seats
CAD designed seat mounts for maximum seat support
CNC cut 5mm alloy
CNC precision folded
Meets MSA / FIA specification
Seat side mounts hole centres measurement: 290mm
For motorsport use

STEEL - RACE SEAT SIDE MOUNTING BRACKETS

PART: RX-MSM-STICKER

Universal fitting, fits most side mount race seats
Laser cut 3mm steel
CNC precision folded
Black powder coated finish
Seat side mounts hole centres measurement: 290mm
Meets MSA specification for motorsport use

MADE IN UK

MADE IN UK

WELD IN SEAT RAIL MOUNTING KIT SUB FRAME - CDS TUBES

PART: MST1313

Weld in seat mounting sub frame kit
2 x 25mm CDS tubes
4 x Weld on brackets with floating captive nuts
4 x Side strengthener plates
(Supplied loose)

ALLOY - 6 PIECE RACE SEAT SIDE MOUNTING BRACKETS

PART: MT-SM6P-BK

5mm alloy
Universal fitting, fits most side mount race seats
Slotted adjustment lower bracket, for fine seat adjustment
Black anodized finish
High tensile socket cap bolts, nuts and washers included
Meets MSA specification for motorsport use

MOTAMEC 4 POINT HARNESS FIA APPROVED 3" STRAPS ALLOY ADJUSTERS

PART: MOTAMECRUCU-200

Designed and developed for driver comfort and safety. The harnesses feature lightweight alloy shoulder adjusters and quick release aircraft buckle. 3" shoulder and lap straps. Shoulder attachments on the harness can be undone to loop round harness bars on the roll cage. Includes velcro fastener on shoulder to fasten intercom and drink systems. Colours available: red, blue or black. FIA Approved

MOTAMEC 6 POINT HARNESS FIA APPROVED 3" STRAPS ALLOY ADJUSTERS

PART: MOTAMECRUCU-202

6 point version, designed and developed for driver comfort and safety. The Harnesses feature lightweight alloy shoulder adjusters and quick release aircraft buckle. 3" shoulder and lap straps, 2" crutch straps. Shoulder attachments on the harness can be undone to loop round harness bars on the roll cage. Includes velcro fastener on shoulder to fasten intercom and drink systems. Colours available: red, blue or black. FIA Approved

MOTAMEC 6 POINT HANS HARNESS FIA APPROVED 3" / 2" STRAPS ALLOY ADJUSTERS

PART: MOTAMECRUCU-501-HANS

Designed for use with FHR / HANS® this 6 point harnesses features lightweight alloy shoulder adjusters and quick release aircraft buckle. 3" shoulder and lap straps, 2" crutch straps. Shoulder attachments on the harness can be undone to loop round harness bars on the roll cage. Includes velcro fastener on shoulder to fasten intercom and drink systems. Colours available: red, blue or black. FIA Approved

Premium Quality Rally Mud Flaps 5mm for increased flexibility and durability even in the most adverse conditions. Kaylan mud flaps compared to the traditional PVC applications are proven to have increased strength, repeated flexibility and can also withstand a wide range of temperatures without losing its material properties. Therefore, regardless if your next rally event is in the freezing temperatures of Finland or in the soaring heat of Australia, the Motamec Kaylan mud flaps will perform the same. The proven choice of WRC teams. Eligible for all MSA and FIA International Rally events.

Made in the UK. SOLD IN PAIRS.

HOSES

200 SERIES - JIC

CONSTRUCTION: Stainless Steel Braided Hose - Synthetic CPE (Chlorinated Polyethylene) Rubber inner, reinforced using a nylon inner braid. Finished with a high quality double braided Stainless Steel outer.

APPLICATION: For use with fuel systems, methanol, oil, lubricants, coolant systems and vacuum applications.

TEMP RANGE: -40 C to 150 C

FITTINGS: To be used with our standard range of reusable fittings.

PART NUMBER	SIZE	BORE SIZE ID	OUTSIDE DIA OD	WORKING PRESSURE	BURST PRESSURE
MST0721-4-M	-04 AN/JIC	5.6MM	11.1MM	1000PSI	6000PSI

600 TEFLON SERIES -JIC

CONSTRUCTION: PTFE Teflon Stainless Steel Braided Hose - PTFE Teflon smooth bore inner. Finished with a high quality braided Stainless Steel outer for excellent abrasion resistance.

APPLICATION: For use with fuel systems, brake systems, clutch systems, nitrous, power steering, oil, and other hydraulics .

TEMP RANGE: -70 C to 250 C

FITTINGS: To be used with our TEFLON range of reusable fittings featuring a brass olive seal. Fittings are reusable, however the brass olive MUST BE REPLACED AND NEVER REUSED.

MST0725-8-M	-08 AN/JIC	11.1MM	13.7MM	2000PSI	8000PSI

500 PUSH ON SERIES

CONSTRUCTION: Rubber inner, reinforced using a nylon braid.

APPLICATION: For use with fuel systems, methanol, oil, lubricants, coolant systems and vacuum applications.

TEMP RANGE: -40 C to 93 C

FITTINGS: To be used with our Push-On range of reusable fittings.

500 PUSH ON SERIES

CONSTRUCTION: Soft rubber inner, finished with a high quality braided Stainless Steel outer.

APPLICATION: For use with fuel systems, methanol, oil, lubricants, coolant systems and vacuum applications. 8mm push on hose ideal for fuel systems.

TEMP RANGE: -40 C to 93 C

FITTINGS: To be used with our Push-On range of reusable fittings.

LASER WHEEL ALIGNMENT TRACKING GAUGES

PART: MSTMKA010

Designed to suit the needs of the cost-conscious motorsport competitor / mechanic. Laser alignment accuracy, at a fraction of the cost. Steel construction gauge measures toe-in and toe-out by contact with wheel rims and laser beam alignment. Works on practically all cars and light commercial vehicles with rim diameters between 200 and 600mm. Some assembly required prior to use. Operating instructions included. Powered by two AA batteries. Easy to use. Measuring range +/- 3°. Battery powered (2 x AA batteries). Rugged and lightweight

ALLOY STEERING TURNTABLES 2 TONNE PER PAIR & RAMPS

PART: MT-701102

The Motamec aluminium turn tables are designed for use with wheel alignment gauges and camber / castor gauges to accurately set suspension geometry. The turntables can also be used to measure toe-in/out and full lock angles. L shape locking pins prevent rotation of table whilst driving car on and ensure accurate angular measurements. Sold as a pair complete with solid rubber ramps for use on workshop floor or can be used on car ramps. Measures up to 50° rotation in either direction. Maximum loading 2000kg per pair. Table Diameter: 350mm. Table Height: 53mm. Table Movement: 45mm Front-to-back, 45mm Side-to-side. 2 x Locking Pins per turntable.

TYRE PRESSURE GAUGE DIGITAL LCD DISPLAY FLEXIBLE HOSE 0-60PSI

PART: MT-TPG-DGI-E

Dial Diameter: 50mm
Pressure Range: 0-150psi (0-10bar) / 10KG/CM² or 1000KPA
Accuracy: ±1%
Resolution: 0.5psi
LCD Size: 21x10mm
Auto Off: 15 seconds
335mm Armoured flexible hose
45 degree chuck
Built-in Pressure Release Valve
Black Steel Housing with Protective Rubber Cover
Operating Temperature: -10°C to 40°C
Battery: 1 x CR2032 (Supplied)
Meets ANSI Grade B Specifications.

TYRE PRESSURE GAUGE DIGITAL LCD DISPLAY 0-60 PSI

PART: MT-TPG-DGI

Dial Diameter: 50mm
Pressure Range: 0-150psi (0-10bar) / 10KG/CM² or 1000KPA
Accuracy: ±1%
Resolution: 0.5psi
LCD Size: 21x10mm
Auto Off: 15 seconds

PART: MSTPB3

Pit signal board, lightweight, 3 row tubular frame
(Numbers not included, available separately)

LARGE PRO PIT BOARD NUMBERS SET

PART: MSTLPBNY

9 - 1/2" / 24cm High Pit Board number set, suits out Motamec Large Pro Motorsport Pit Board. Available in various colours. Kit Includes:
Numbers 0 to 9 (4x of each number), 2 x full stops/points, 1x IN, P, L, OUT, FUEL, -, + and an arrow.

SMALL PIT BOARD NUMBERS SET

PART: MSTPBNY

Pit Board number set, suits the standard 3 & 4 Row Pit Boards. Numbers: 0-9 (3 of each)
1x FUEL, 1x IN, 1x P, 1x L, 1x +, 1x -, 1x ., Available in various colours.

ENGINE STANDS PAIR PINTO COSWORTH BDA

PART: MOTAES-1

Motamec Professional Engine Stands for transportation and storage of engines.
Bolts straight on to the block after engine is removed from car for safety and to avoid damage. Also used to safely lift and transport engines in vehicles and on pallets.
As used by professional engine builders

Suitable for most Ford 4 cylinder Ford engines: Pinto, X-Flow, Cosworth, BDA, Lotus Twin Cam etc. Can be modified to suit other engine blocks

Tubular steel engine stands
Black Powder Coated Finish
Sold as a Pair. R/H & L/H

 Non-slip drawer liners supplied in all drawers
 Integral locking system locks all drawers with the turn of 1 key.
 Supplied with 2 keys.
 Gas struts fitted to lid to make opening easy
 Use with M90 roll cab or as a stand alone unit

M90 ROLLER CABINET

BLUE / BLACK RED / BLACK

PART: MT9007RC-BL **PART:** MT9007RC-RD

Motamec Motorsport M90 Series Roller Cabinet Tool Chest - 7 Drawer
 Motorsport Inspired, professional quality tool chest unit, as used by race teams and professional garages
 Heavy-duty welded steel construction for strength and durability
 High Gloss powder coat finish, solvent and rust resistant
 Ball bearing drawer runners provide superior performance and carry heavier loads
 Drawers have side locking device preventing inadvertent opening when box is being moved
 Heavy duty Side Handles
 Side mounted screwdriver holder
 Side mounted extendable work tray
 2 x Side mounted can & bottle holder
 Non-slip drawer liners supplied in all drawers
 Heavy-duty Ø125mm Mag style castors - 2 swivel with brakes and 2 fixed
 Integral locking system locks all drawers with the turn of 1 key.
 Supplied with 2 keys.
 Supplied with Heavy Duty PVC top cover for use as a workstation when not used with a topchest
 Use with M90 top chest or as a stand alone unit

HEAVY DUTY **BALL BEARING DRAWERS**

MOTORSPORT M50 WORK BENCH HEAVY DUTY WORKSTATION

BLUE / BLACK RED / BLACK

PART: MT5011WB-BL **PART:** MT5011WB-RD

Motamec Motorsport M50 Series Workbench - 2 Drawer
 Motorsport Inspired, professional quality tool chest unit, as used by race teams and professional garages
 Heavy-duty welded steel construction for strength and durability
 High Gloss powder coat finish, solvent and rust resistant
 40mm heavy duty wood laminate top
 Open lower shelf for storage of larger items
 4 x Adjustable feet for levelling on uneven ground
 2 x Built in heavy duty steel drawers
 Ball bearing drawer runners provide superior performance and carry heavier loads
 Non-slip drawer liners
 Integral locking system locks all drawers with the turn of 1 key.
 Supplied with 2 keys.

CO-DRIVER IN CAR BAG HOLDER WITH ROLL CAGE STRAPS

PART: MT-BAG22
Unique design, integrated door bar straps, allows attachment to the door bars
4 x Velcro roll cage straps, fully adjustable to suit all types of roll cages, suits single and cross diagonal door bars
Heavy duty stitching and fabric
Standard clip-board size bag
External mobile phone pouch
Pen & pencil holders on front and each side
2 x additional zipped compartments

HELMET AND HANS BAG HOLDER

PART: MT-BAG28
Heavy duty lined bag protects race equipment
Ideal for drivers and co-drivers
Helmet not included
Heavy duty stitching and fabric
Clip-on shoulder strap

CO-DRIVER BAG /LAPTOP CASE DOCUMENT HOLDER

PART: MT-BAG24
Ideal for co-drivers, drivers, team directors etc
Internal padded compartment for laptop, tablet etc.
Heavy duty stitching and fabric
Clip-on shoulder strap

WRC TOOL BAG BACKPACK WITH INTERNAL TOOL ROLL HOLDER

PART: MT-BAG61
Heavy duty multi compartment tool bag with tool roll
Includes clip on shoulder straps
Heavy duty stitching and fabric

STEALTH BLACK MODULAR TOOL BOX CART

PART: MTCBK1-MT1

Motamec Mobile Tool Box Unit - 4 Module cart

As used by various race teams as a race track tool box

Ideal for on site use, unit splits down to suit the job in hand

Approx dimensions - Width x Depth x Height

Overall Outer Size - 500mm x 300mm x 889mm

Inner Size - Top Box - 430mm x 220mm x 150mm

Inner Size - Middle drawers - 390mm x 215mm x 60mm

Inner Size - Lower compartment - 400mm x 210mm x 240mm

Net Weight 20Kg

MOTAMEC RACING MODULAR TOOL BOX CART

PART: MTCBK1-MT2-RED

Motamec Mobile Tool Box Unit - 4 Module cart

As used by various race teams as a race track tool box

Ideal for on site use, unit splits down to suit the job in hand

Approx dimensions - Width x Depth x Height

Overall Outer Size - 500mm x 300mm x 889mm

Inner Size - Top Box - 430mm x 220mm x 150mm

Inner Size - Middle drawers - 390mm x 215mm x 60mm

Inner Size - Lower compartment - 400mm x 210mm x 240mm

Net Weight 20Kg

HOW TO ASSEMBLE AN/JIC FITTINGS - OIL HOSE

how to / assemble an/jic fittings - oil hose

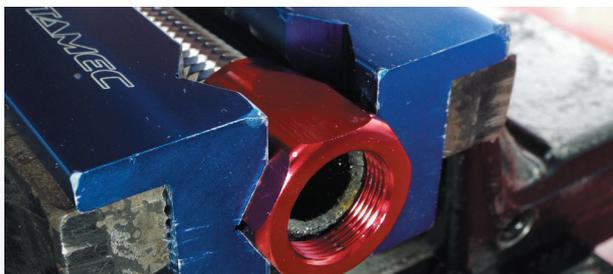

STEP 1 - TOOLS

Bench Mounted Vice, Motamec Vice Jaws, Motamec -12AN/JIC Alloy Spanner, Small tip flat head screwdriver, Pliers, A Fine Tooth Hand Saw, Some lubricant.

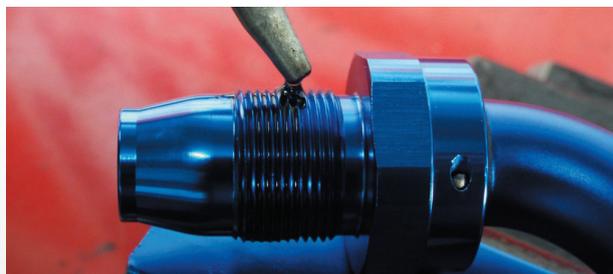

STEP 2 - MEASURE TWICE CUT ONCE

As it's very important to have a very clean and straight cut, and with this thickness of hose, we recommend using a fine toothed saw and taping up the area to be cut with masking tape. This will reduce fraying on the stainless steel braid.

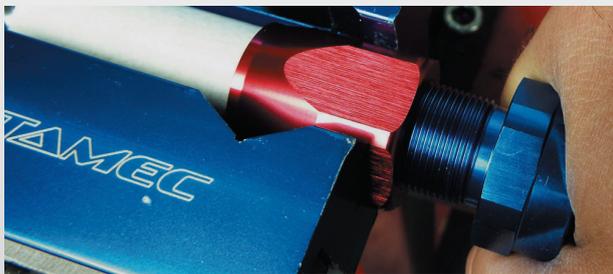

STEP 3 - INSERT HOSE INTO FITTING

Remove the masking tape. Now we unscrew the hose end of our fitting. Then using a twisting motion push the hose into the back of the red part of the fitting. Once you've got it started off we recommend placing it in a vice. Keep pushing the hose into the fitting until the end of the hose is secured against the step inside the hose end.

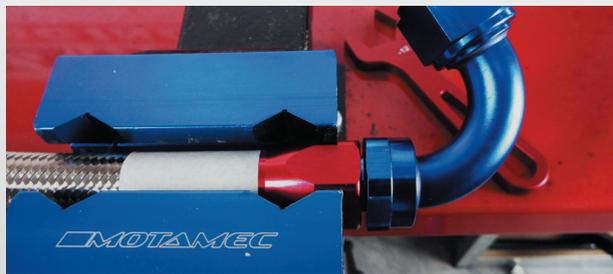

STEP 4 - PREPARE THE FITTING

We have put some more masking tape on the exposed part of the hose. This is IMPORTANT, so we can see if the hose moves when we tighten it up at the next step. Next you should lubricate the thread on the fitting.

STEP 5 - TIGHTENING THE FITTING

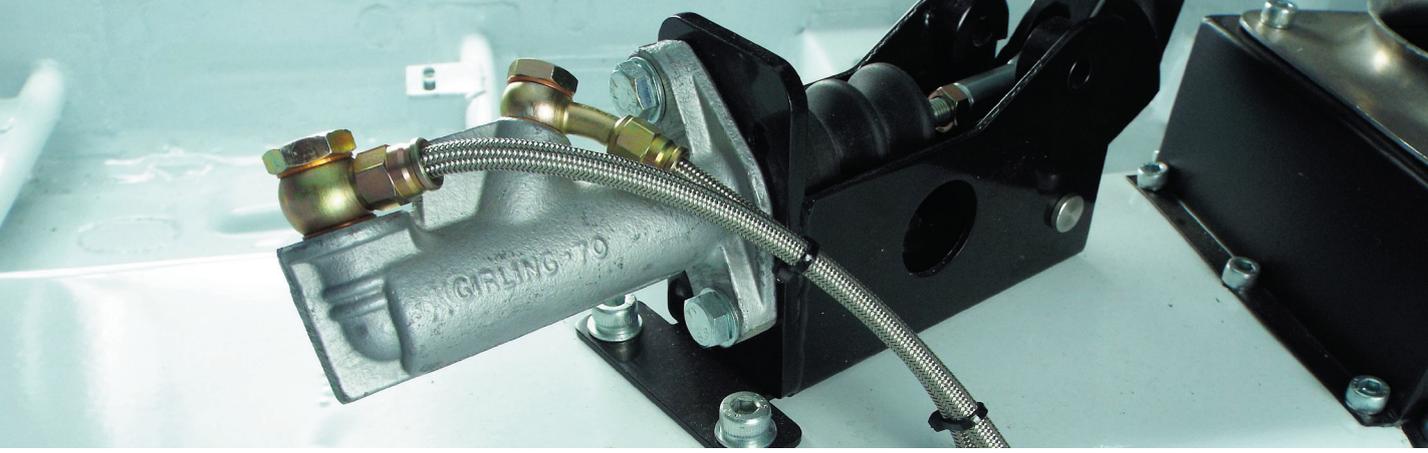

Then using your hands insert the fitting into the hose end and get it started on the threads. Once this starts to become tight use an AN spanner to tighten the fitting up.

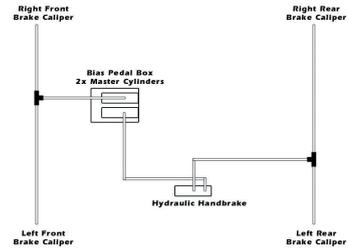

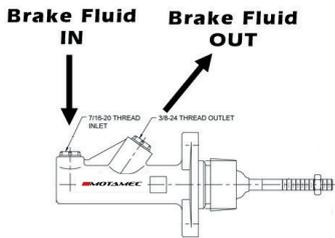

STEP 6 - THE FINISHED HOSE

The first picture below shows our finished hose with a small gap remaining. Also the masking tape shows us that the hose didn't move, we can now remove that masking tape. Finally we can use our hose and fitting for its intended purpose on an oil cooler. When connecting to an oil cooler do not exceed 35Nm of torque.

The above is presented as a guide only and should be assembled by a competent person, if in doubt seek professional assistance.

HOW TO SETUP RALLY CAR BRAKE SYSTEM

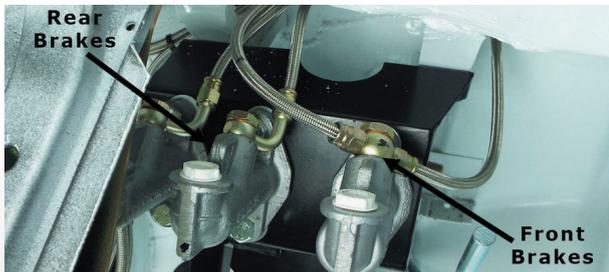

STEP 1 - BRAKE MASTER CYLINDER

Firstly its very important to take a look at a typical master cylinder. Pay close attention to direction brake fluid flows through the master cylinder. A master cylinder should always be plumbed in with 'fluid in' and 'fluid out' as shown in the picture below, whether used in the pedal box or inline on a hydraulic handbrake.

STEP 2 - MOTORSPORT BRAKE SYSTEM

The setup above uses a bias pedal box so the balance of braking force between front and the rear of the car can be adjusted. This setup has 2x master cylinders on the pedal box, one for front brakes and one for rear brakes. This setup also has a hydraulic handbrake. But it does not have a brake bias valve.

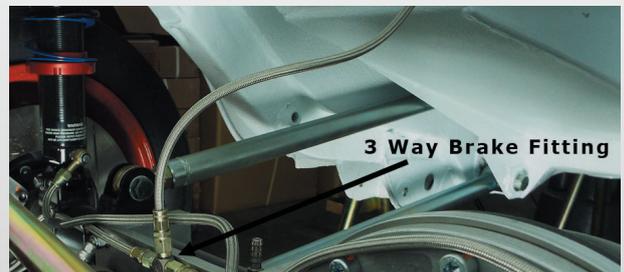

STEP 3 - INSERT HOSE INTO FITTING

There are 3 master cylinders, 1 hydraulic clutch, 1 rear brake and 1 front brake. The fluid reservoirs are not yet fitted. The master cylinder on the right is for the front brakes. A twin banjo is used to split the left and right front brake callipers. This is different to the diagram but acceptable. The middle master cylinder is for the rear brakes with a single banjo fitting.

STEP 4 - LEFT HAND BRAKE CALLIPER

The brake hose for the left hand brake calliper. Here a bulkhead fitting is used.

STEP 5 - RIGHT HAND BRAKE CALLIPER

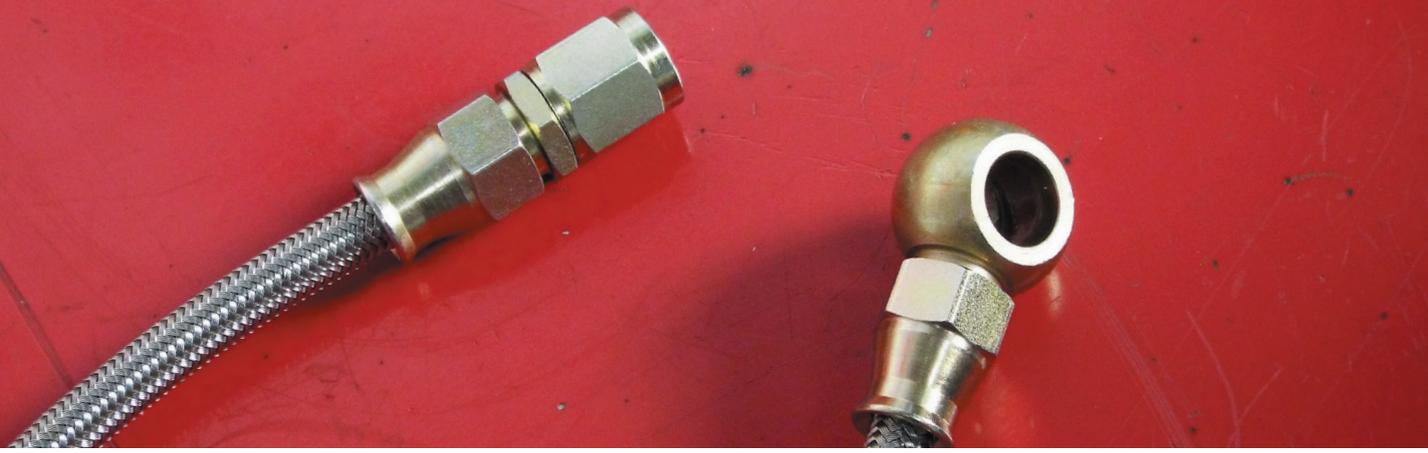

The brake hose for the right hand brake calliper. Again a bulkhead fitting is used.

STEP 6 - THE FINISHED HOSE

From the other side of the rear bulkhead fitting you can see the hose connects to the axle. (You must allow for movement of the axle, the car is sitting on sill stands in this picture) The 3 way brake fitting is fitted too the axle, splitting the brake line for left and right rear callipers.

The above is presented as a guide only and should be assembled by a competent person, if in doubt seek professional assistance.

how to / setup rally brake hose

HOW TO ASSEMBLE PTFE BRAKE & FUEL HOSES

how to / assemble ptfе brake & fuel hoses

STEP 1 - TOOLS

Bench Mounted Vice, Motamec Vice Jaws, Motamec -4AN/JIC Alloy Spanner, Small tip flat head screwdriver, Pliers, Either a fine tooth saw or a good sharp set of cutters, Some lubricant.

STEP 2 - MEASURE TWICE CUT ONCE

Measure the amount of hose you want and then cut it. We have chosen to cut out hose using very sharp cutters. But if in doubt use a fine toothed saw, especially on thicker hose. As it's very important to have a very clean and straight cut.

STEP 3 - FITTING THE OLIVE

Take fittings apart as shown. Slide the female end of the fitting over the hose with the thread facing the end. Make room to slide the olive onto the Teflon inner. Using a flat head screwdriver work the outside of the Teflon, moving the stainless steel out to create a chamfer. Insert the olive onto the Teflon inner. Tap the olive into place until the Teflon inner hose meets the 'step' inside the olive.

STEP 4 - ASSEMBLING THE FITTING

Now it time to finish assembling the fitting. The first image below should give you an idea of what's next. But firstly we like to get a drop of lubricant on the fitting. Now you need to push the hose onto the fitting so the mandrel on the fitting goes inside the Teflon inner hose. Push the hose on all the way down so the olive meets the base.

STEP 5 - TIGHTENING THE FITTING

It's IMPORTANT to make sure that no loose strands of stainless steel braid interfere with the thread on the fitting. Getting stainless steel braid stuck in the thread will risk damaging the fitting beyond repair. So now to tighten up that fitting, you may need to position the fitting in the vice to secure the swivel part of the fitting (if using a swivel fitting). Progressively tighten the fitting securely using the appropriate spanner.

STEP 6 - THE FINISHED HOSE

Now you can use the same method on different fittings of this type. For example the banjo fitting show below is assembled in the same way. With that banjo fitted our hose is complete and ready to use!

The above is presented as a guide only and should be assembled by a competent person, if in doubt seek professional assistance.
